

## BROW CODE

### STAIN HYBRID DYE

## FAQS

---

#### WHAT IS STAIN DYE?

Stain is a Hybrid Dye professional brow colour that consists of half henna and half brow tint. Hybrid Dye offers the power and intensity of henna with the ease of a tint.

#### HOW LONG DOES STAIN LAST?

If you follow the correct aftercare, Brow Code Hybrid Dye leaves a stain on the skin for up to 10 days and on the brow hairs for up to 6 weeks.

#### WHAT IS THE BEFORE AND AFTERCARE FOR STAIN HYBRID DYE?

Important Note: The Hybrid Dye stain can feel darker on the first day, however, please note this is an important step of the process as the stain continues to oxidize on the skin and settle into its finished shade. The stain will start to fade gradually as soon as the brows are wet.

- Avoid using makeup and facial cleansers around the brow area for the following 24 hours.
- Avoid prolonged exposure to any direct sunlight, the use of sunbeds, saunas, steam rooms, and swimming pools for 24 hours.
- Avoid exfoliating and using anti-aging products around the brow area for at least two to three days prior to and post-treatment.
- Avoid using any self-tanning products on the face for around two to three days on either side of the treatment.
- Avoid the temptation to over-touch the brow area after treatment. Touch with fingers can lead to oils entering open pores and clogging them.

#### CAN I DO LAMINATION AND STAIN IN THE SAME SERVICE?

Yes, you can pair Lamination and Stain in the same service. We recommend applying Stain in between steps 2 and 3 of the Brow Code lamination process. Alternatively, you can Stain the brows 24 hours before and/or after completing the lamination treatment.

#### IS STAIN HYBRID DYE SAFE FOR PREGNANT AND BREASTFEED WOMEN?

Stain Hybrid Dye is not safe for pregnant and breastfeeding women. There is a risk of the chemicals sinking into the skin and potentially entering into your blood stream. If you are pregnant and breastfeeding we recommend that you consult with a healthcare professional you trust before.

#### WHAT IS THE RECOMMENDED SERVICE TIMING?

Application times can vary between 5-12 minutes depending on the desired intensity and results. We recommend a total time of 10 minutes, however, please watch the dye closely to see how the colour is processing. For the best result try removing the front of the brow after a few minutes for an ombre effect.

#### DOES STAIN HYBRID DYE LAST LONGER THAN HENNA?

Stain Hybrid Dye and Henna both last up to 10 days on the skin, however, Stain lasts up to 6 weeks on the hairs and Henna lasts up to 4 weeks on the hairs. We always recommend offering both treatments in your brow studio or salon as the client may have a preference or find one or the other better for their skin type and skin.

#### DOES STAIN HYBRID DYE LAST LONGER THAN TINT?

Yes, however, we always recommend offering both treatments in your brow studio or salon as the client may have a preference or find one or the other better for their skin type and skin.
